

STATEMENT FROM DXRC AVT

21/06/2013

All Official DXRC activation proofs are validated by DXRC AVT (Activity Validation Team).

AVT look at the received proofs and other supporting material and score the proofs between 0 and 100. The higher the final score grading the higher the quality of proofs received.

Scores are categorized into three (3) Groups:

Based on the score the result of validation is like this:

- scores between 100 and 67: The activity is APPROVED and DXRC-Bureau will send out QSL-cards
- scores between 34 and 66: The activity is ACCEPTED and DXRC-Bureau will send out QSL-cards
- scores between 0 and 33: The activity is NOSTATUS and DXRC-Bureau will NOT send out QSL-cards

138DX/1 8th and 9th June 2013

Extensive proofs have been received from 1DX041 Davide.

Pictures, videos, GPS, receipts, documents, all have now been checked along with independent Statements from non DXRC members.

We are very happy to announce that DXRC AVT has awarded 138DX/1 "APPROVED" status due to its very high score: 96% (which is among the highest scores issued by DXRC AVT ever).

Delta-Xray Radio Club
Mette, President

Note: this statement is made due to the importance of 138DX/1.
