

DXRC World Meeting 2011 a success.

During the days November 25-27th DXRC celebrated its 10 Years Anniversary (2001-2011) at the World Meeting in Genner, Denmark. 14 DXRC-members and approx. 30 operators in total had an enjoyable weekend, in a very friendly atmosphere – and all left the meeting filled with inspiration,

Once again DXRC presented a Top line of interested presentations, presented by Top Performers; here are some of them;

- 21DX011 Erik, presenting 21DX/EU176-activation in the typical "Shadow-DX'ers" style giving us interesting 60 minutes. Great to see the serious approach the team has when it comes to running an activation.
- 19SD348 Henry entertained us with antenna-theory. Henry managed to speak and take questions for 60 minutes, and the entire room was listening extremely interested. Thanks Henry, for capture us with your knowledge about antennas.
- One of the Major Activities for 2011 was the 349AT/0-activation by 19AT346 Richard and 19AT066 Steven. Richard and Steven showed us all from their interesting trip to Saba island in the West Indies, log, bills, tickets – and a very interesting 30 minutes video... And on top of all, Richard and Steven brought the newly printed 349AT/0 QSL-cards so all in log got the 349AT/0-QSL at the meeting. Thanks for QSL ☺
- Dimitri, 19AT102 explained us about Remote Controlled radio stations and via his own RemoRig-system Dimitri - from the portable setup in the Presentation Room – Dimitri worked stations from the Caribbean via his station in Holland.
- Our very own 47DX052 Tom explained about how he runs his QSL-management Bureau – it was in interesting look into "the secret world" of QSL-management. Tom also presented the plans for 47DX/SJ032 Elleore island –activation in summer 2012 and in corporation with the HAM-community, as they simultaneously will work on 11-meter and at ham-bands as OZ1KOE. Tom will be QSL-manager for QSL's for all bands (incl. 11-meter), same informational website will be made for all bands (incl. 11-meter). The activation will be in memory of 47DX047 Leif (OZ7TRE), as Leif originate came up with the idea.

A few other interesting aspects from the Meeting:

- The coming activation **326DX/1** (summer 2012) is offered to a selected numbers of members from DXRC. If all seats are not taken, non-DXRC members can have a seat. The activation will be organised with help from 317AT101 Andy and Andy's "inside-friends".

- DXRC has received a request from ET-club to look over the **proofs from 287ET/0** – one of the rare true /0-activities. We are very proud that another club comes to us – simply because we show the most professionalism and highest quality seen on band. We will do our best...

- DXRC expects to open for "applications for membership" around February 2012.

- At the Award Dinner Saturday night, DXRC presented 3 awards:

- * DXRC "Rookie of the year"-Award – to 47DX109 Jesper

- * DXRC "Achievement Award" – to 47DX052 Tom

- * DXRC "10 years Honor Award" – to 47DX101 John

More info about awards at dedicated Press Release.

Thanks to the local organisers:

47DX019 Henrik, 47DX109 Jesper, 47DX116 Frank, 47DX132 Carsten
